

- 1.Created class Sum.
- 2.Took two 3 variables n1,n2 (for addition)and add(to store the sum).
- 3.Keeping in mind the precedence of operator added the two nos and printed it.

Screenshot:

```
C:\Users\IBM_ADMIN\javaprg>java Sum
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true
Enter two numbers
7
-9
Sum of two numbers:-2
